#### Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/24/2007 has been entered.

### Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 14, 16, and 18 stand rejected under 35 U.S.C. 102(b) as being anticipated by USP 6,179,144 to Abroy et al.

Abroy et al discloses a cabinet comprising all the elements recited in the above listed claims including a back portion 24 fixedly connectable to a wall, a cover portion 36 cooperating with the back portion 24 to form an interior space and being detachably connected to the back portion, a hinge structure 48 having a first component connected to one of the back portion 24 and the cover portion 36 and a second, complementary component connected to the other of the back portion 24 and the cover portion 36; a vent formed in the cover portion 36, said vent being defined as the gap formed by member 60 of the cover portion 36 and the back portion, such as shown in Fig 4, a

Art Unit: 3637

water diverting plate 96 disposed below the vent and on the back portion; wherein the hinge structure includes a pair of mounting brackets formed on opposite sides of the back portion, and pivot pin engaging each of the mounting brackets, the vent comprises a gap formed between the cover portion and the wall.

## Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  - 1. Determining the scope and contents of the prior art.
  - 2. Ascertaining the differences between the prior art and the claims at issue.
  - 3. Resolving the level of ordinary skill in the pertinent art.
  - Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 6. Claims 1, 4-11 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Abroy et al in view of USP 4,223,965 to Palandrani.

Abroy et al discloses a cabinet comprising all the elements recited in the above listed claims including a back portion 24 fixedly connectable to a wall, a cover portion 36 cooperating with the back portion 24 to form an interior space and being detachably connected to the back portion, a hinge structure 48 having a first component connected to one of the back portion 24 and the cover portion 36 and a second, complementary

Art Unit: 3637

component connected to the other of the back portion 24 and the cover portion 36; a vent formed in the cover portion 36, said vent being defined as the gap formed by member 60 of the cover portion 36 and the back portion, such as shown in Fig 4, a water diverting plate 96 disposed below the vent and on the back portion; wherein the hinge structure includes a pair of mounting brackets formed on opposite sides of the back portion, and pivot pin engaging each of the mounting brackets, the vent comprises a gap formed between the cover portion and the wall. The different being that Abroy et al does not clearly disclose spacer means comprising a plurality of protrusions extending outwardly from a rear surface of the back portion.

Palandrani discloses a wall mounted cabinet comprising spacer means comprising a plurality of protrusions 19 extending outwardly from a rear surface of the back portion, such as shown in Figs 2-3, in order to facilitate mounting the cabinet to a wall, at the same time preventing water from seeping along the wall into the interior of the cabinet. Therefore, it would have been obvious to modify the structure of Abroy et al by providing spacer means comprising a plurality of protrusions extending outwardly from a rear surface of the back portion in order to facilitate mounting the cabinet to a wall, at the same time preventing water from seeping along the wall into the interior of the cabinet, as taught by Palandrani, since both teach alternate conventional wall mounted cabinet structure, used for the same intended purpose, thereby providing structure as claimed.

7. Claims 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Abroy et al in view of Palandrani.

Abroy et al discloses all the elements as discussed above except for spacer means comprising a plurality of protrusions extending outwardly from a rear surface of the back portion.

Palandrani discloses a wall mounted cabinet comprising spacer means comprising a plurality of protrusions 19 extending outwardly from a rear surface of the back portion, such as shown in Figs 2-3, in order to facilitate mounting the cabinet to a wall, at the same time preventing water from seeping along the wall into the interior of the cabinet. Therefore, it would have been obvious to modify the structure of Abroy et al by providing spacer means comprising a plurality of protrusions extending outwardly from a rear surface of the back portion in order to facilitate mounting the cabinet to a wall, at the same time preventing water from seeping along the wall into the interior of the cabinet, as taught by Palandrani, since both teach alternate conventional wall mounted cabinet structure, used for the same intended purpose, thereby providing structure as claimed.

# Allowable Subject Matter

8. Claims 12-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

# Response to Arguments

9. Applicant's arguments filed 5/24/2007 have been fully considered but they are not persuasive. In response to applicant's argument regarding Abroy, the examiner

Application/Control Number: 10/623,619 Page 6

Art Unit: 3637

takes the position that the claimed language fails to provide adequate structural limitations to the claim in order to distinguish from Abroy.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hanh V. Tran whose telephone number is (571) 272-6868. The examiner can normally be reached on Monday-Thursday, and alternate Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lanna Mai can be reached on (571) 272-6867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
